Cleveland Public Schools take great pride in the quality of education that is provided to its students. Parents, business leaders, community members, students, and district employees have high expectations in helping to prepare our students for the world in which they live.

We believe the success of our students is a collaborative process. Input from our stakeholders is vital to us as we continue to grow as a district. This strategic plan is a prime example of such collaboration. The plan is the culmination of several months of hard work between board members, teachers, administrators, staff, and community leaders. This collaboration has helped not only in building a vision of the District’s future, but also in the development of the roadmap that will take us there. Cleveland is a unique school district. We are rural, yet many of our families commute to Tulsa to work. We have a very large busing district, transporting over half of our students to school each day. We pull students from numerous small communities into our Cleveland School family. Each factor shapes our schools and district. Bringing multiple stakeholders together to clearly articulate our values, vision, mission, focus areas, and objectives better enables us to work towards improvement and excellence.

I am grateful for all of the time, energy, hard work, and creativity given by many in the development of this plan. As we continue to move forward, the strategic plan will be used to guide our direction in doing that which is in the best interest of our students and community and will make clear the goals and objectives of Cleveland Public Schools.

The Cleveland Public School District is committed to building lifelong learners to meet tomorrow’s challenges. Cleveland Public Schools’ 2020-2025 Strategic Plan is recognized as a blueprint of district transformation and change. The district embarked on a transparent year-long journey to develop a five-year comprehensive continuous improvement plan that is driven by stakeholders and data. The district is committed to student growth and readiness. The plan addresses not only the mastery of student learning in core content areas, but also stresses the importance of increasing critical and creative thinking and problem-solving. This will be accomplished by initiatives that address curriculum alignment, district-wide benchmarking, project-based learning, and active student engagement strategies. The plan emphasizes meeting the diverse needs of all Cleveland students by the implementation of targeted interventions, including attention to gifted and talented instruction and programs and the implementation of the Individual Career Academic Planning (ICAP) initiative to increase college and career readiness. Personnel growth and development is required to meet these educational goals for students. The plan focuses on the development of a marketing plan, as well as a retention plan to recruit and retain quality personnel, and a formal professional development plan for all employees that can be implemented through professional learning communities.

The Cleveland community is recognized and valued. Attention is given to the development of community- and student-centered resources by increasing parent and community partnerships, increasing and improving student opportunities, and improving and maintaining the physical resources of the district. Finally, the district recognizes the importance of a positive school environment in which students are productive and opportunities are provided to engage community volunteers through an outreach program and a communication plan. This plan is the framework through which the district supports the development of each child to his/her potential. It will serve as the foundation for each school in the district to develop annual plans, which are designed to support the implementation of the district’s five-year strategic plan. The initiatives and action steps will be continually monitored, and the Board of Education will be regularly updated as to the progress of the plan. This strategic plan sets the expectation that each student, regardless of ethnicity, language, disability, or income level, can achieve high standards of learning. Strategies are included to ensure students will meet or exceed standards, graduate on time, and be college and career ready.
CLEVELAND TIGERS
“Who are we?” district’s learner expectations, core beliefs, and core values

The purpose of this phase is critical to the fidelity and sustainability of public education. Phase I gained stakeholder input in determining the community’s educational objectives. This process included community forums to engage stakeholders in reflective dialogue about the purpose and process of education in a local context. The community survey offered a second opportunity for stakeholders to provide input and ideas. Data collected from these tools were analyzed to reflect the community’s learner expectations, core beliefs, and core values that were used throughout the strategic planning process. Goal areas and performance objectives developed in Phase II were aligned to them.

“Where are we now?” goal areas and performance objectives

In this phase, the Planning Team, composed of school and community members selected by the District Leadership Team, engaged in a collaborative inquiry process to implement change. Team members were representative of the demographics of the district, with 75% of the membership comprised of district leaders, school administrators, and teachers. The other 25% were students, parents, community members, and a school board member who followed the process and served as a liaison to the local board of education. The Planning Team examined and analyzed a variety of district data types and sources. At the end of the second day of planning, based on the data analysis, goal areas were decided, along with performance objectives for each goal area.

“Where do we want to go?” and “How will we know when we get there?” SMART performance measures, initiatives for each performance objective, action steps for each initiative, timeline of initiatives

All members of the Planning Team returned for this phase. Their first task was to make certain that the goal areas and performance objectives were aligned to the community’s learner expectations, core beliefs, and core values. After two days, the team had developed action steps as well as performance measures that were Specific, Measurable, Attainable, Results-oriented, and Time-bound (SMART). On the third day, the Action Team developed a timeline for the five-year plan, being sure to avoid placing too many initiatives in any one year, to avoid overloading any responsible person, and to avoid creating a burden on the budget in any one year.

“How do we plan to get there?”

training of a site leadership team from each school site in the district to develop a site-level, year-one plan

The district needs to be held accountable to achieve the goals set forth by this process. This phase works with a leadership team from each school site to instruct them in the process of examining the district’s strategic plan and determining how each of their sites will address the plan. Using their individual school data, each school site develops a year one plan, which will support the implementation of the district’s strategic plan. An accountability flow chart is developed and shared.

COMMUNITY ENGAGEMENT REPORT

The district’s learner expectations, core beliefs, and core values were developed from the community responses to the online survey and the focus questions asked at the community forums. All responses were compiled and then analyzed to represent one of these areas. As the strategic planning committees worked through the various stages of developing goals, objectives, initiatives, and action steps, they paused at each level of work to check their decisions against what the community had expressed. Alignment to these expectations, core beliefs, and values are noted in the rationale statements for each objective.
Learner Expectations

Cleveland Public Schools expects the graduates of 2029 to possess...

- Effective communication skills
- Critical thinking skills
- Organization, goal setting, and time management skills
- Creativity
- Collaboration skills
- Life skills
- Mastery of core content
- Technology skills
- Conflict resolution skills
- Financial skills

These expectations will help to develop college- and career-ready graduates who possess the life skills necessary to be productive citizens.

Core Beliefs

Cleveland Public Schools believes that, to realize their expectations for graduates, teaching and learning should provide...

- Community service opportunities
- Opportunities for creativity and innovation
- Community support
- Connections across content areas
- College and career readiness
- Education about opportunities after high school
- Student use of technology
- Opportunities to address student strengths and weaknesses
- Opportunities for collaboration
- Counseling services
- Enrichment opportunities
- Opportunities to locate, evaluate, use information

This type of teaching and learning, when paired with family support and parents as leaders, will create connections across content areas and opportunities for student leadership.

Core Values

In order to ensure quality teaching and learning, Cleveland Public Schools values...

- Respectful and nurturing environment
- Quality teachers
- Quality programs
- Up-to-date technology
- Quality school buildings and grounds
- Parental involvement and supportive families
- Small class size
- Innovative teaching
- School-community connection
- Adequate financials
- Addressing health issues of students
- Strong leadership

By upholding these values and providing a rigorous curriculum with high-quality instructional materials, Cleveland Public Schools will meet the diverse needs of students in a student-centered learning environment.

ACKNOWLEDGMENTS

The Oklahoma State School Boards Association (OSSBA) and the K20 Center for Educational and Community Renewal recognize the Cleveland Public School District, Board of Education, and site administrators in this endeavor to determine a path for continuous strategic improvement. Through this stakeholder-driven process, a five-year strategic plan, directly aligned to the community’s learner expectations, core beliefs, and core values, has been developed to provide guidance for Cleveland Public Schools’ decision making and actions in the coming years. We also would like to acknowledge the dedication of the Planning Team and Action Team members who contributed their time, expertise, experience, and enthusiasm to the development of the Cleveland Public School District Strategic Plan. Their engagement in this process mirrors the community’s investment in education and commitment to student achievement.

We appreciated the opportunity to work with the Cleveland Public School District.
