

The member districts of the North Canadian River Basketball Conference intend to complete the 2020 - 2021 basketball season while maintaining the safest environment possible. The success of this season will depend on the health and safety of our student athletes and the communities they represent. District leadership has worked together to outline some basic measures that respect the safety protocols established by healthcare organizations. While each district will have unique challenges and opportunities, the following includes measures that each district can assume are being implemented at each facility.

- Masks are mandatory for all spectators while in the facility.
- Masks must cover the nose and mouth while fitting tightly.
- Each district will limit capacity sufficiently to accommodate social distancing guidelines, and unavailable seating should be marked. Site administration will attempt to accommodate family units, but social distancing will be enforced.
- Spectators that refuse to follow guidelines, will be asked to leave the venue
- Games may be paused and resumed only when all spectators are following guidelines
- Districts will maintain a recommended 10 feet of space between the first row of spectators and the team bench.
- Team personnel will be limited to 20; however, any district may establish further limitations based on gym configuration and capacity.
- Cheerleaders will be limited to no more than 6 members
- Water jugs will not be provided by the host school. Players should supply personal water bottles and towels
- Spectators should not congregate in common areas. At the conclusion of the contest, spectators will exit the facility promptly.

Other accommodations recommended but not required:

- Limit time allowed in locker rooms to no more than 15 minutes with at least a 30 minute break for disinfecting
- One way in / One way out
- 6 feet of space between personnel on bench
- Electronic ticketing
- Host school will film and provide simultaneous broadcast access to visiting school and community
